Executive Summary

Rate remained at 150, showing a flat trend of 0.0% over the period. The period covered 40 records from 2025-01-06 to 2025-01-31.

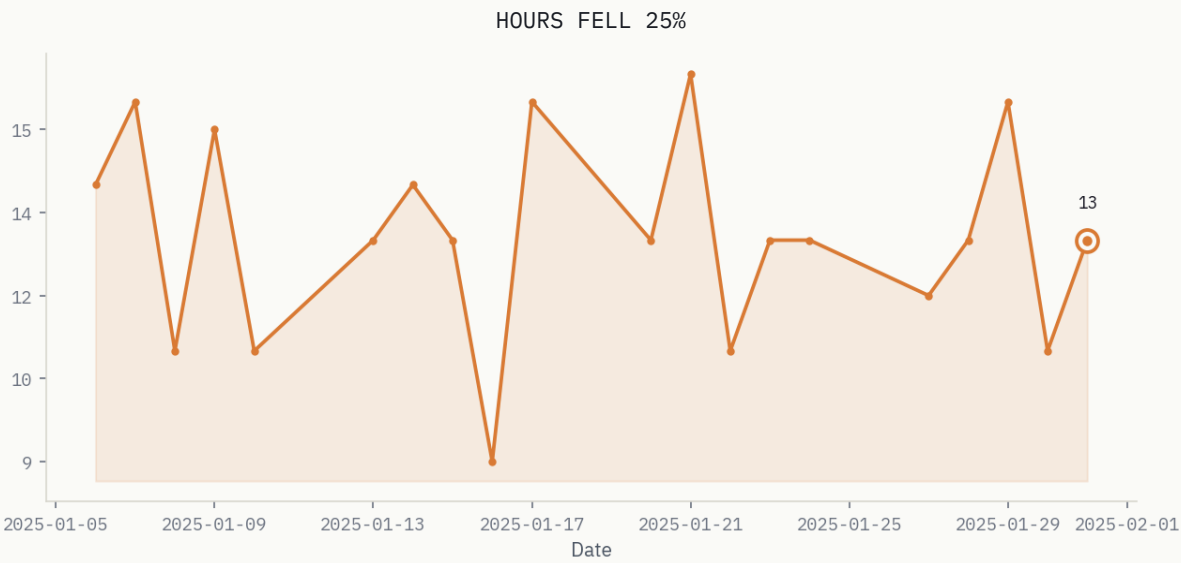

TOTAL HOURS	261.50	-25.0% (monthly trend)
TOTAL BILLABLE AMOUNT	\$39.5K	-25.0% (monthly trend)
AVG RATE	\$148.75	+0.0% (monthly trend)

Hours fell to 6 in the latest record, a 25.0% decline, while Billable Amount averaged 988.38, latest 900. Mean hours were 6.54, indicating the recent dip is below average performance. The drop in hours reduces labor capacity, potentially lowering total billable revenue despite stable rates. If the hour reduction persists, projected monthly billable amount could fall below the mean of \$988.38, pressuring profitability. Reallocate resources to increase billable hours to at least 7 per record within the next two weeks. Monitor daily hour entries and trigger a corrective alert when any day's total drops below 6.5 hours.

Recommendations

01

Increase average Hours from the current 6.0 to at least 7.0 per period by scheduling additional client work sessions.

02

Reduce the variance between minimum and maximum Rate by standardizing pricing, aiming to keep rates between 130 and 160.

03

Implement a quarterly review of Billable Amount to raise the latest value from 900 to above the mean of 988.38.

04

Optimize the utilization of Hours by reallocating low-hour tasks, targeting a 10% increase in billable hours per employee.

05

Launch a targeted marketing campaign to attract higher-rate projects, seeking to raise the average Rate from 148.75 to above 155 within the next six months.
