## Executive Summary

---

**H**ours fell to 6 in the latest reading, representing a 25.0% decline from the period mean of 6.54. This contraction signals a potential shortfall in service delivery capacity.

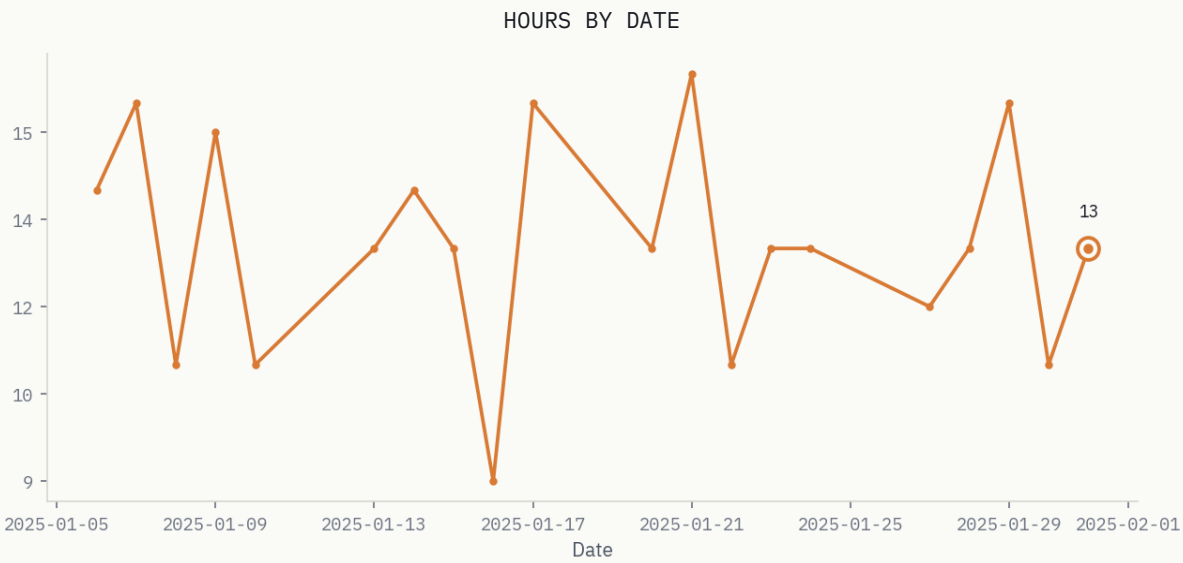

|                       |                 |               |
|-----------------------|-----------------|---------------|
| TOTAL HOURS           | <b>261.50</b>   | <b>-25.0%</b> |
| TOTAL BILLABLE AMOUNT | <b>\$39.5K</b>  | <b>-25.0%</b> |
| AVG RATE              | <b>\$148.75</b> | <b>+0.0%</b>  |

Rate held steady at 150, matching the mean of 148.75 and showing a 0.0% trend. Stability in rate suggests pricing remains competitive despite lower utilization. The reduction in hours cuts billable capacity, while the flat rate prevents offsetting revenue loss through higher pricing. Consequently, total billable amount fell to 900, 88.9% of the 988.38 mean, reducing overall revenue. Increase scheduled work assignments to raise average hours to at least the 6.54 mean within the next two weeks. Monitor hourly utilization daily and adjust staffing allocations to meet the target within the specified timeframe.

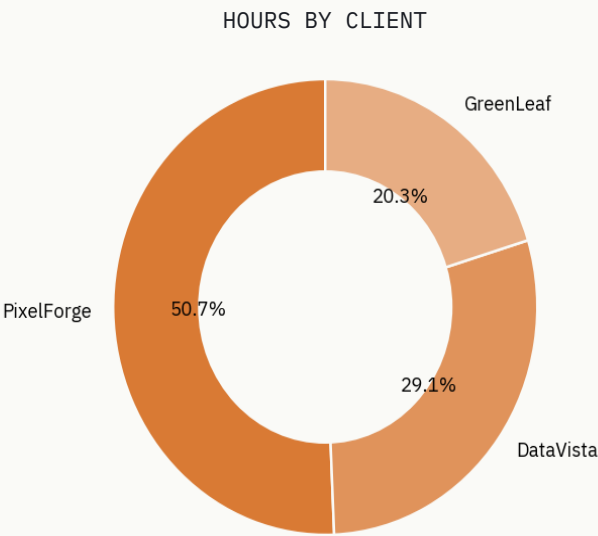

# Key Metrics Overview

|    |                       |          |           |
|----|-----------------------|----------|-----------|
| 01 | Total Hours           | 261.50   | ↓ - 25.0% |
| 02 | Avg Rate              | \$148.75 | ↑ + 0.0%  |
| 03 | Total Billable Amount | \$39.5K  | ↓ - 25.0% |

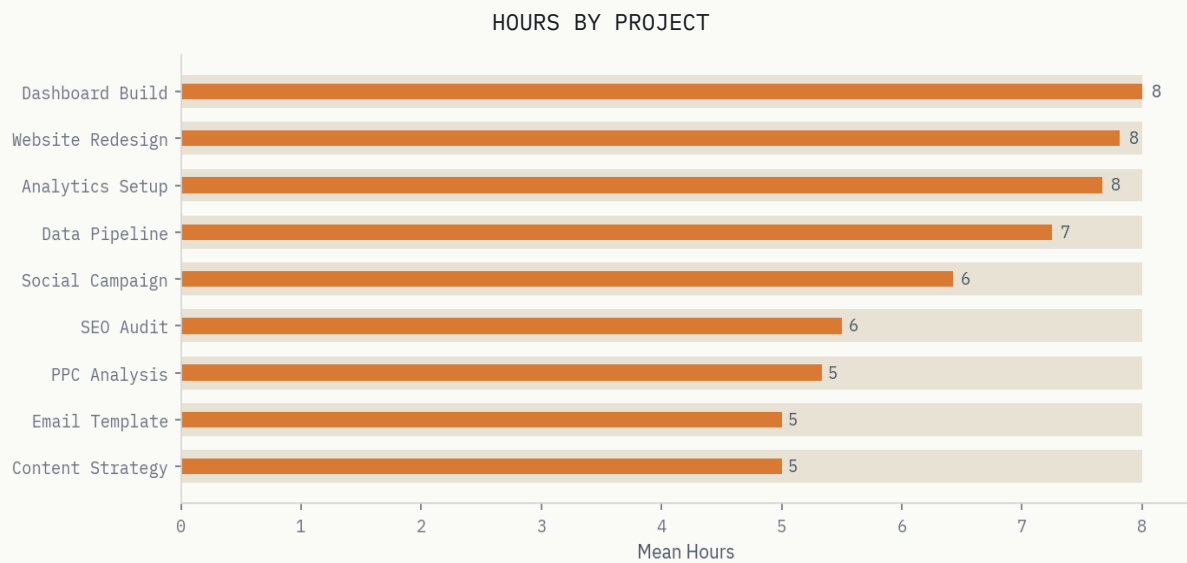

# Charts & Visualizations

Hours fell from 8 to 6 across 40 points (-25%).

Across 40 records, Hours ranges from 4 to 8.

Dashboard Build tops Hours at 8; Content Strategy trails at 5.

# AI Insights

---

- 01

Hours

**6.0 is 0.54 hours below the mean of 6.54**

The latest recorded hours dropped, indicating a recent dip in workload or resource utilization.

→ Conduct a workload analysis this week and reallocate staff to projects with higher demand to bring hours back to target levels.

HIGH
- 02

Rate

**148.75 is 28.75 above the minimum of 120.0**

Rate has remained flat across the period, showing stable pricing without volatility.

→ Test a modest 3% price increase on new contracts to capture additional margin while monitoring client response.

MEDIUM
- 03

Billable Amount

**900.0 is 88.38 below the mean of 988.38**

The latest billable amount fell, likely reflecting the combined effect of lower hours and a flat rate.

→ Implement a weekly dashboard that flags billable amounts dropping more than 5% from the rolling average for corrective action.

LOW

# Data Table

| DATE       | CLIENT     | PROJECT          | HOURS | RATE | BILLABLE AMOUNT | STATUS  |

## Recommendations

---

01

Increase the average Hours from the current 6.0 to at least 7.0 per period by scheduling additional client meetings.

02

Optimize the Rate by raising it from the latest 150.0 to the maximum observed 175.0 for high-value projects.

03

Reduce the variance in Billable Amount by targeting a minimum of 800.0 on all invoices.

04

Implement a weekly review of Hours and Rate to identify opportunities to boost the Billable Amount above the current 900.0.

05

Launch a targeted upsell campaign aiming to increase the Billable Amount to the mean of 988.38 within the next quarter.
