Executive Summary

Hours fell 25.0% to a latest value of 6, marking the biggest concern for the period. The mean hours of 6.54 further highlight the contraction from the period's baseline.

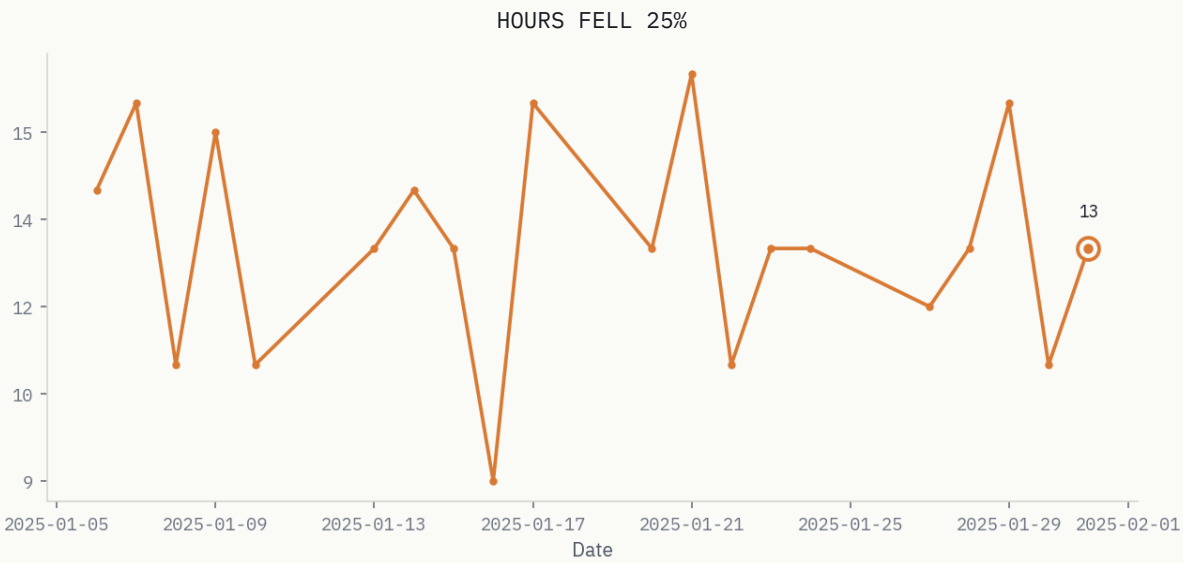

TOTAL HOURS	261.50	-25.0% (monthly trend)
TOTAL BILLABLE AMOUNT	\$39.5K	-25.0% (monthly trend)
AVG RATE	\$148.75	+0.0% (monthly trend)

Rate held steady at a latest 150, matching the mean of 148.75 across the 40 records. This stability in rate supports the potential to offset hour declines if utilization improves. The drop in hours combined with stable rates reduces the average billable amount to a latest 900, below the mean of 988.38, indicating lower revenue capture per record. Consequently, total revenue from the 40 records is likely below projected targets for the month. Implement a minimum hour threshold of 7 per record to restore average billable amounts toward the mean level. Monitor hour compliance weekly and adjust staffing allocations to meet the new threshold.

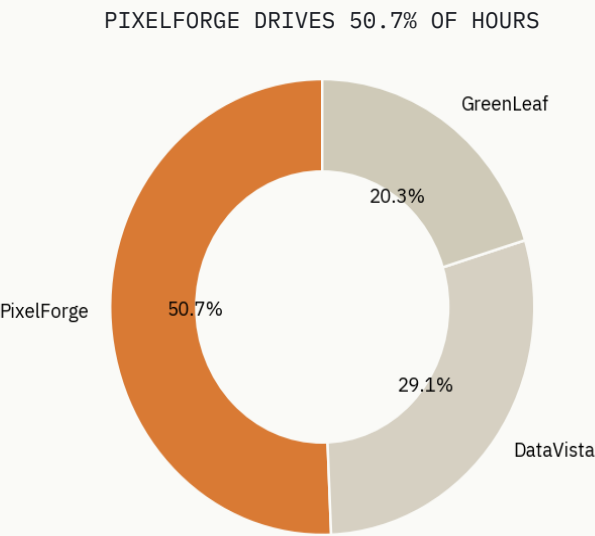

Key Metrics Overview

Charts & Visualizations

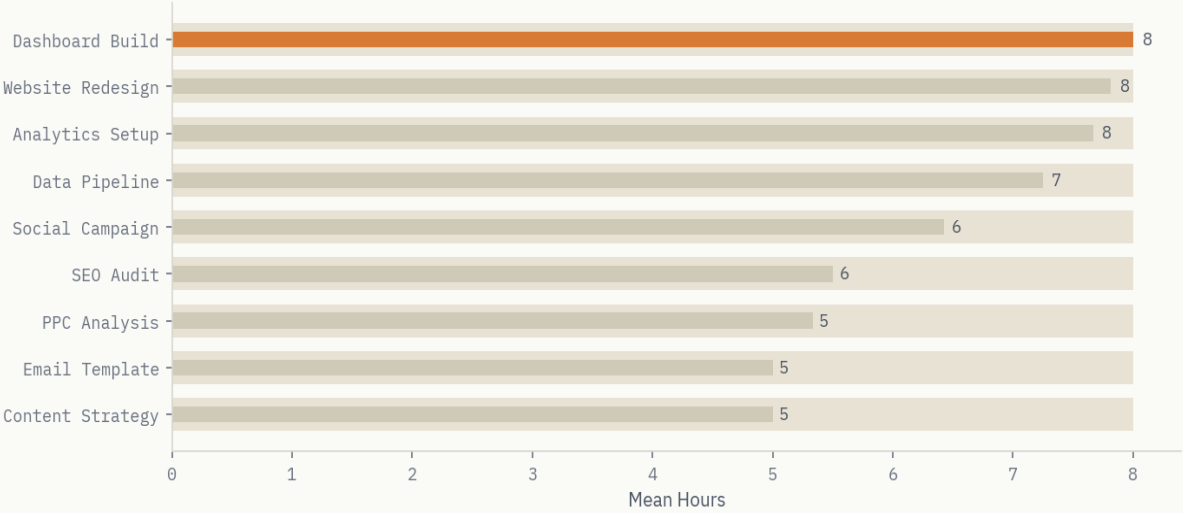

Hours fell from 8 to 6 across 40 points (-25% from first to last).

Across 40 records, Hours ranges from 4 to 8.

DASHBOARD BUILD LEADS HOURS

Dashboard Build tops Hours at 8; Content Strategy trails at 5.

AI Insights

01 Hours

HIGH

6.0 latest value is 0.54 hours below the 6.54 mean

Recent dip in logged hours suggests reduced workload or inefficiency

→ Conduct a task-level audit to identify under-utilized resources and reallocate work to meet target hours

02 Rate

MEDIUM

150.0 latest value is slightly above the 148.75 mean

Rate has remained flat with no change, indicating pricing stability

→ Maintain current pricing strategy but monitor competitor rates quarterly

03 Billable Amount

LOW

900.0 latest value is 88.38 below the 988.38 mean

Billable amount fell below average, reflecting lower revenue generation

→ Review project mix and adjust billing rates or increase billable utilization to lift amounts

Recommendations

01

Increase the average Hours from the current 6.0 to at least 7.0 per period by scheduling additional client work.

02

Optimize the Rate by raising it from the current 150.0 to 160.0 for new contracts to improve revenue.

03

Reduce the variance in Billable Amount by targeting a minimum of 950.0 on each invoice, using the latest value of 900.0 as a baseline.

04

Implement a weekly review of Hours logged to identify and address any flat trends, aiming for a 10% increase over the next month.

05

Launch a pricing audit to align the Rate with market benchmarks, ensuring the mean of 148.75 moves toward the max of 175.0.
