Executive Summary

Hours dropped to 6 in the latest reading, representing a 25.0% decline from the period mean of 6.54 across 40 records between 2025-01-06 and 2025-01-31.

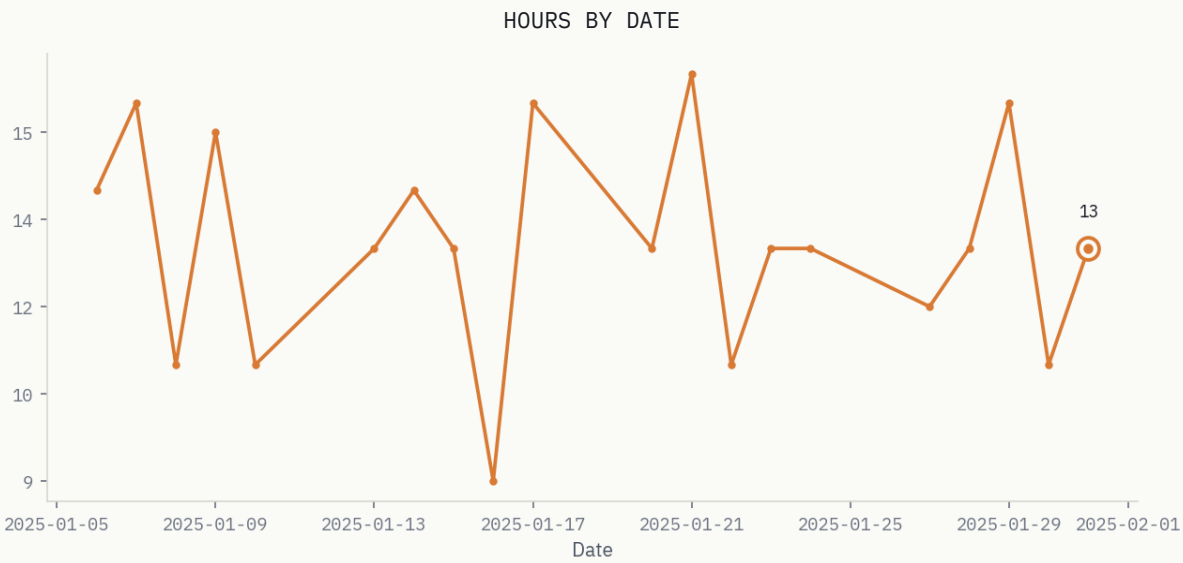

TOTAL HOURS	261.50	-25.0% (monthly trend)
TOTAL BILLABLE AMOUNT	\$39.5K	-25.0% (monthly trend)
AVG RATE	\$148.75	+0.0% (monthly trend)

Rate remained stable at 150, unchanged from its mean of 148.75, with a 0.0% trend, indicating pricing consistency despite the hour reduction. The sharp reduction in hours alongside steady rates suggests billable revenue may fall, as the latest billable amount of 900 is below the mean of 988.38, potentially eroding profit margins if the hour shortfall persists. Immediately review staffing allocations, reassign underutilized resources, and implement a minimum target of 7 billable hours per record to stabilize revenue and align with the observed rate performance.

Key Metrics Overview

01	Total Hours	261.50	↓ - 25.0%
			monthly trend
02	Avg Rate	\$148.75	↑ + 0.0%
			monthly trend
03	Total Billable Amount	\$39.5K	↓ - 25.0%
			monthly trend

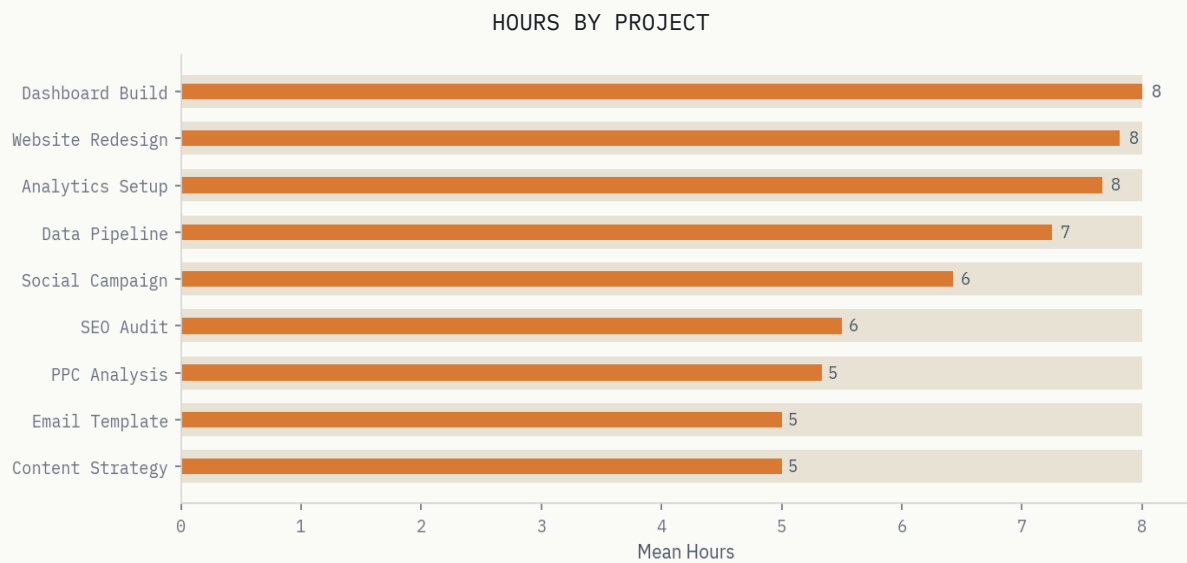

Charts & Visualizations

Hours fell from 8 to 6 across 40 points (-25% from first to last).

Across 40 records, Hours ranges from 4 to 8.

Dashboard Build tops Hours at 8; Content Strategy trails at 5.

AI Insights

01

Hours

HIGH

6.0 hours recorded in the latest period, a 25% decline from the

Recent dip in logged hours despite an overall flat trend suggests a short-term capacity reduction

→ Conduct a root-cause analysis with team leads to identify scheduling or workload issues and reallocate resources to restore average hours

02

Billable Amount

MEDIUM

900.0 dollars latest billable amount, 25% lower than the period

Drop in billable amount mirrors the decline in hours while the rate remains stable, indicating under-utilization

→ Review project assignments and utilization rates, then adjust staffing or pricing to bring billable amounts back toward the mean

03

Rate

LOW

150.0 dollars per hour latest rate, unchanged from the overall

Flat trend and zero percent change show pricing stability across the period

→ Maintain current rate structure but monitor market benchmarks quarterly to ensure competitiveness

Recommendations

01

Increase the average Hours worked per project from the current 6.0 to at least 7.0 by adjusting staffing schedules and adding a buffer for high-priority tasks.

02

Reduce the gap between the minimum and maximum Billable Amount by setting a floor of \$800 for all invoices, which will raise the latest value toward the mean of \$988.38.

03

Optimize the Rate by targeting higher-value clients to raise the latest rate from \$150 to \$155 within the next quarter.

04

Implement a weekly performance dashboard that tracks the latest Hours, Rate, and Billable Amount to quickly identify any deviations from the flat trend.

05

Launch a bonus program tied to achieving a Billable Amount above \$1,000 per project to incentivize higher revenue generation.
